eGovPoliNet
The Policy Community

Building a global multidisciplinary digital governance and policy modeling research and practice community

Building Research & Policy Community

Are you POLICY MAKER …

… CONSULTANT …

… PRACTITIONER …

… RESEARCHER …

Connecting Policy Network to Citizens' Needs

… IT PROVIDER …

… CITIZEN …?

We connect you to solutions for your Public Policy Issues

eGovPoliNet is an initiative supported by the European Commission that aims to establish an **International Policy Community** which deals with ICT solutions for Governance and Policy Modelling. 18 partners from 16 countries both within and outside of the EU are working together to share ideas, experiences and practices in the field.

eGovPoliNet focuses on generating interaction amongst experts from various scientific disciplines and practitioner groups in order to provide evidence and insight into the development of new methods of **Governance** and **Policy Modelling** for those involved in the policymaking process.

eGovPoliNet Community Targets

➡ **Strengthen** scientific, technological and social research and practice excellence in all disciplines related to the digital public governance and policy modelling domains.

➡ **Develop** an international knowledge base to enable the sharing of skills and expertise in the field, thus leading to an innovative barometer of effectiveness of research and practice for public governance and policy modelling.

➡ **Overcome** the existing fragmentation and integrate the research and practice capacities of individuals and organisations spread across Europe and worldwide.

➡ **Build** a sustainable framework to ensure the long term viability and widespread adoption of the project results.

Become a member of our Community

Benefits: The portal and the offline events shall offer people from academia, industry and government meeting points to share and exchange knowledge and ideas, to network and to build constituency. In this aim the Community will be able to ensure access to groups of experts; invitation to international events; organisation of thematic events in your country; a free virtual space to submit cases and develop services based on the latest technology features; weekly updates on network news and relevant events. Each new member will can enlarge the own network in order to build future collaboration on the challenges oriented towards the Governance and Policy Modelling.

Your Role: Share knowledge and ideas, expertise and feedbacks on the project achievements, the scientific contribution, the network activities, the strategic decisions, the events realisations, the new potential insights and fields of application.

Join! In order to provide and exchange added value to and from the network you are expected to be an active member. Join eGovPoliNet by visiting our website:
